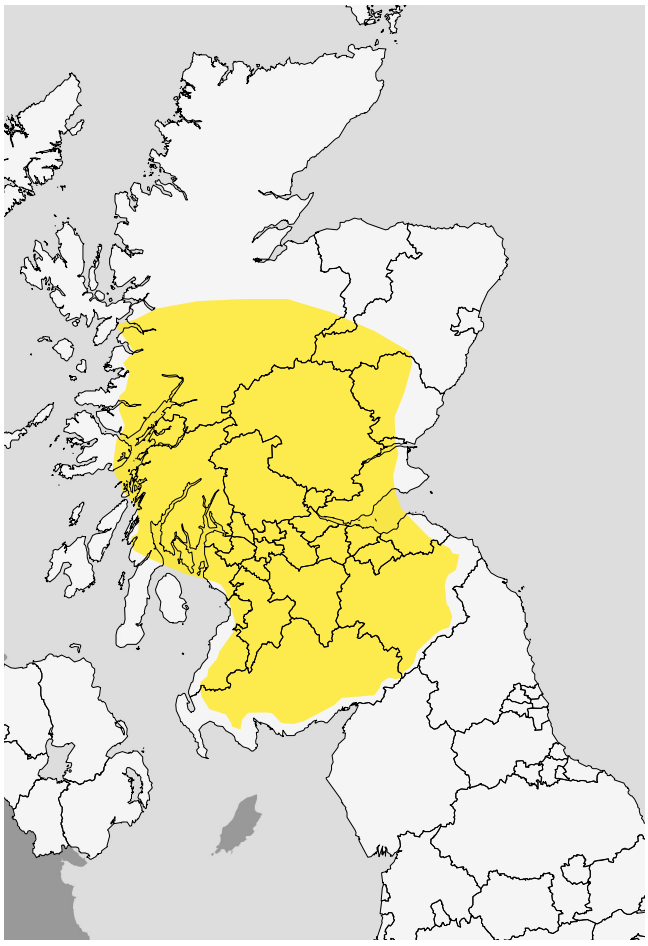
Yellow warning
Snow & Ice

Between
06:00 Fri 16 Dec 2022 and
23:59 Fri 16 Dec 2022



Outbreaks of snow and icy surfaces likely to bring some disruption.

What to expect

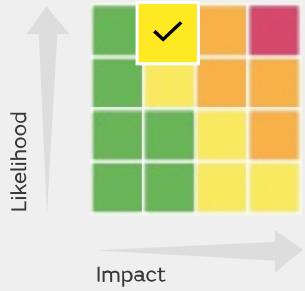
- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Some icy patches on some untreated roads, pavements and cycle paths
- A slight chance that power cuts occur, with the potential to affect other services, such as mobile phone coverage

Further details

Outbreaks of sleet and snow will spread across much of southern, central and western Scotland through Friday. 1-3 cm of snow is likely in places below 200 metres, with 5-8 cm possible above 200 metres south of the Central Belt. Over high ground north of the Central Belt, there is potential for 10-20cm to accumulate above 200 metres through Friday.

Later in the day, snow at low levels will likely turn to rain.

In addition to the snow, sleet or rain may fall onto frozen surfaces leading to some icy conditions.



✓ High likelihood of low impacts

Issued at 10:43 Wed 14 Dec, 2022
